SUMMARY

Passionate and result driven Data Science & AIML enthusiast with hands on experience in data analysis, Machine Learning, Deep Learning and Flask based Model Deployment. Skilled in Python, scikit-learn, TensorFlow and NLP with strong foundation in Statistics.

EDUCATION

Shri Guru Sandipani Institute of Technology and Science (RGPV) Ujjain, India
Bachelor of Engineering in Computer Science Engineering | CGPA: 7.89 2022 – 2026

SKILLS

Programming Languages: Python, SQL

ML: Supervised & Unsupervised Learning, scikit-learn, Regression, Classification, NLP

Deep Learning: TensorFlow, Neural Network (CNN, RNN), NLTK, Text Preprocessing

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, EDA, Plotly

Databases & Tools: MySQL, Docker, GitHub, Jupyter Notebook, Streamlit, Flask, FastAPI

AI & Automation: LLM, Chatbot, Gen AI, LangChain, RAG

EXPERIENCE

Infotact Solutions - Bangalore, India

Data Science & ML Intern - Remote

May 2025 – Aug 2025

- Collaborate with teams to develop data-driven solutions. Collecting, cleaning, and preprocessing structured & unstructured data.
- Building and deploy ML models using Python and related frameworks. Performed EDA and create visualizations.
- Optimization of models for accuracy and performance. Document code, methods, and results.

Darkiee – Indore, India

AI/ML Engineer Intern – Remote

June 2026 – Aug 2026

- Developed and integrated Python-based backend services and RESTful APIs using FastAPI, including database integration, authentication, validation, and CRUD functionality.
- Contributed to AI-powered application development, integrating AI/ML models and backend APIs to build intelligent and automation-focused solutions.
- Utilized Git and GitHub for version control, code management, branching, repository management, and collaborative software development.

PROJECTS

AI City Digital Twin

- Built an AI-based Digital Twin system to model and simulate real-world city environments for smart urban planning.
- Implemented data-driven simulations and predictive analytics to analyze traffic patterns, environmental conditions, and emergency scenarios.
- Developed an interactive system with real-time data processing and visualization, improving monitoring and operational efficiency.

AI Powered SQL Chat Assistant

- Developed an AI-powered SQL chatbot using LangChain, Groq LLM, Streamlit, SQLite, and MySQL to enable natural language interaction with databases.
- Implemented dynamic database connectivity with support for both local SQLite databases and external MySQL databases, including secure credential handling using environment variable.
- An intelligent SQL agent capable of converting user queries into SQL commands, executing database operations, and returning real-time responses through Streamlit interface

Movie Review Analyzer System

- Developed a Movie Review Sentiment Analyzer using RNN and NLP techniques to classify reviews as positive or negative.
- Applied text preprocessing steps like tokenization, padding, and embedding to prepare data for deep learning models.
- Trained and optimized an RNN model to capture sequential patterns in text and improve prediction accuracy.

CERTIFICATION

- Complete Generative AI course with langchain and huggingface – Udemy (Krish Naik)
- Data Science with Generative AI – PW Wallah
